

Company Overview

CPM
SPECIAL BEARINGS

CPM, established in 1967, designs and manufactures special ball, roller and needle-roller bearings in medium and high series. The company has constantly increased its turnover, investing in know-how, up-to-date technology and production facilities, focusing on a "made in Italy" quality standard. Over 3 million pieces per year are produced inside CPM,

both for the domestic and international markets. The entire production process is carried out in house, from turning and heat treatment, to grinding and assembly. Each item is developed starting from high quality materials and is monitored by severe quality controls through the entire production process.

Our goal is total product reliability!

Our size range goes from 10 mm bore up to 800 mm external diameter.

Special roller bearings:

- Cylindrical roller bearings full-complement and with cage
- Single and double-row tapered roller bearings
- Needle roller bearings full-complement and with cage
- Crossed roller bearings

Special ball bearings:

- Single-row and double-row radial ball bearings
- Angular contact ball bearings with clearance or pre-load
- Four-point contact ball bearings
- Slim series ball bearings
- Self-aligning ball bearings

Others:

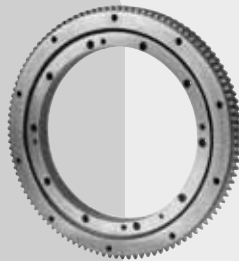

- Slewing rings
- Precision rings

Applications

Textile machinery

Robotics

Agricultural machinery

Marble-working machinery

Cardanic transmissions

Material handling machinery

Radioscopic equipment

Earthmovers

Hydraulic pumps and motors

Precision rings

Wood-working machinery

Fuel volumetric meters

Wind power

Steel making

Bottling

Customers

GEARBOXES

AXLES

TEXTILE

ROBOTICS & AUTOMATION

MARBLE WORKING

MECHANICAL TRANSMISSION
